Review-2

OUTPUT

Project Description: Module-3 LANE DETECTION AND LANE DEPARTURE WARNING

Lane Detection and Lane Departure Warning Module

This module **Lane Detection and Lane Departure Warning Module** detects lane markings from camera input and identifies the vehicle's position within the lane. It monitors the vehicle's movement and detects unintended lane departure.

The module provides a warning when the vehicle moves outside the detected lane, helping the driver take corrective action and maintain proper lane position.

Outcome:

The outcome is accurate lane detection with timely departure warnings, improving driving safety and reducing the risk of lane-related accidents.
